

SECOND EMIRATES GATEWAY TO CANADA WITH DUBAI MONTREAL ROUTE

News / Airlines, Airports / Routes

Emirates will launch a new daily service from Dubai to Montréal, starting 5 July. Montréal becomes Emirates' second gateway in Canada, complementing its passenger services to Toronto, which have been operating to Ontario's capital city since 2007. The launch of services to Montréal comes as the UAE and Canada aim to deepen economic cooperation between the two nations and stimulate benefits to the aviation and tourism sectors, in addition to enhancing trade flows and commercial links. The daily flights to the new destination will help cater to the huge demand for direct flights between Dubai and Canada, particularly to its two largest metropolitan hubs, and provide more choice for travellers when flying to Canada.

Adnan Kazim, Emirates' Chief Commercial Officer, commented: "Emirates is excited to launch our second gateway into Canada as we expand our reach in the country with direct services from our hub in Dubai. As a major metropolitan centre and as Canada's second largest city, we are pleased to add Montréal to our growing global network of over 130 destinations and strengthening our coverage in the Americas to reach 18 points served by our services from Dubai. We have been serving customers with passenger and cargo services to Toronto for over 15 years and when we

begin services to Montréal in July, customers will have more choice when planning their travel whether for business, leisure, education or for visiting family and friends. We would like to thank the UAE and Canadian authorities for the enhanced agreements which have made this new destination possible. With our expanded reach into the country, we look forward to facilitating new trade lanes, which will bring a host of benefits to Canadian businesses and exporters in addition to promoting tourism into more cities and generating more jobs across all sectors, including those directly serving the aviation industry.

Passengers from Montréal can enjoy the airline's award-winning services to and through Dubai, and connect safely, seamlessly and efficiently to Emirates' global network of over 130 destinations in over 70 countries and territories. The daily flights between Dubai and Montréal will operate as EK243/244 with a Boeing 777-300ER aircraft in a three-class configuration, offering a premium travel experience across its cabins. Passengers can enjoy Emirates' award-winning travel experience aboard its wide-body aircraft with 8 First Class suites, 42 lie-flat seats in Business Class and 304 seats in Economy Class.
