

# MAGNIFICENT RECEIVES STC VALIDATION IN CANADA

News / Business aviation

Mecaer Aviation Group's (MAG) luxury interior for the Bell 429 has received validation from Transport Canada Civil Aviation. MAG developed and branded the **MAGnificent** for the Bell 429 under an EASA **STC** in May. Since then, it has applied for various international **validations**. Customers can choose from four-, five- or six-seat layouts, with options for up to two center consoles, MAG's proprietary I-FEEL (in-flight entertainment enhanced lounge) and passenger-controlled electrochromic windows.

The interior includes MAG's "SILENS" noise-canceling system, which reduces the cabin noise to a level where passengers can conduct normal conversation without headsets. Meanwhile, MAG's I-FEEL technology provides passengers with moving maps and audio/video entertainment, along with internal Wi-Fi interface to personal smart devices.

"The MAGnificent continues to gain momentum around the world, and the validation with the

TCCA marks a key milestone for the program,” said Armando Sassoli, co-general manager of Mecaer Aviation Group. The company anticipates two more certifications before year-end.
