

# A CARBON NEUTRAL FLIGHT SCHOOL FOR SECOND YEAR RUNNING - QUALITY FLY

News / Maintenance / Trainings

**Madrid-based Quality Fly announced that in 2023, for the second consecutive year, the school has achieved carbon neutrality. This follows on from their proud standing as the first European Flight School to attain carbon neutrality in 2022, proving that they have not just embraced sustainability, but have integrated it into every aspect of their operations. This reaffirms their commitment to environmental stewardship and reinforces their position as leaders in sustainable aviation. Through persistent dedication and proactive measures, Quality Fly continues to pave the way for a greener, more sustainable future in aviation.**

*A green flight path: reducing emissions by 50%*

Quality Fly journey towards carbon neutrality has been propelled by a series of transformative initiatives, such as the complete digitalization of their activity. This has solidified their position at the forefront of sustainable aviation in Europe while working on enhancing the quality of their aviation education. A comprehensive fleet modernization had led to a remarkable 50% reduction in emissions. By investing in state-of-the-art aircraft models, Quality Fly has significantly curbed fuel consumption and emissions, setting a new benchmark for efficiency in flight training.

*Advancing change through renewable energy*

Quality Fly commitment extends beyond their immediate operations. Offsetting their remaining carbon emissions has played a crucial role in their sustainability journey. Quality Fly has partnered

with projects in developing regions of India and China, supporting solar, wind, and hydroelectricity projects. These initiatives not only offset their carbon footprint but also contribute to the socio-economic development of these regions, fostering a sustainable future beyond Quality Fly's immediate sphere. These projects are authorized under the United Nations Framework Convention on Climate Change and demonstrate Quality Fly's commitment to not only carbon neutrality, but also to promoting positive change in regions where it is most needed.

*A vision for tomorrow: towards a 100% electric fleet*

While Quality Fly celebrates their achievements, they also remain committed to future progress, with a vision extending to a 100% electric fleet as soon as this technology becomes fully operational. This aspiration aligns with their ethos of constantly evolving to reduce their environmental footprint while providing top-tier aviation training.

*Leading by example in sustainable aviation*

Quality Fly's transformation to carbon neutrality isn't just a milestone for them; it's a stepping-stone for the industry. As the first carbon-neutral flight school in Spain, Quality Fly is setting a precedent for responsible, high-quality aviation training, and we encourage every other flight school to follow our steps.

*The path forward: excellence, innovation, and responsibility*

Quality Fly journey towards sustainability is an ongoing commitment. By continually assessing and enhancing training methodologies, exploring sustainable aviation fuels, and embracing emerging technologies like hybrid and electric aviation, Quality Fly will continue to drive forward a future of environmentally responsible aviation. Quality Fly, the dedication to excellence, innovation, and environmental responsibility is unwavering. We invite aspiring aviators to join us on this journey, where sustainability meets sky-high standards of aviation education.
