MONARCH AIRCRAFT ENGINEERING: A300 HEAVY MAINTENANCE

News / Maintenance / Trainings

Monarch Aircraft Engineering Ltd (MAEL), the engineering division of Monarch has recently completed a number of back to back **heavy maintenance** checks for a major German cargo airline.

MAEL's highly experienced engineering team carried out scheduled heavy maintenance including various modifications, repairs and out of phase tasks on a total of three aircraft for the German cargo airlines **A300**-600 aircraft at its London Luton Airport facility.

Andy Mackay, Head of Maintenance for Monarch Aircraft Engineering Limited said "As a leadingMRO, this represents our ability to sustain both a high level of quality and on time performance which is expected by our customers."

The Technical Director for the German cargo airline commented "I would like to thank MAEL for the excellent work carried out recently in support of our heavy maintenance requirements. Their expertise in the A300-600 market makes them an ideal provider."
