

PILATUS MADE FIRST APPEARANCE OF PC-12 PRO IN USA AT EAA AIRVENTURE OSHKOSH 2025

News / Business aviation, Manufacturer

In 2025, Pilatus was back at EAA AirVenture Oshkosh. The event brought manufacturers, pilots, specialists and enthusiasts together to discover the latest industry innovations and trends. Pilatus attended with PC-12 PRO for the first time, as well as the latest version of the PC-24 Super Versatile Jet.

Progressive, proven, professional: the PC-12 PRO sets new standards with state-of-the-art avionics which are more advanced than ever before. With the Garmin G3000 Prime at the heart of a completely reimagined cockpit, including five high-resolution touchscreen displays, the PC-12 PRO offers an unprecedented user experience. The best-selling turboprop aircraft in its class, the PC-12 PRO can take you to places which other aircraft can only fly over. The engine is designed to use Sustainable Aviation Fuel, another aspect which speaks to efficient and environmentally friendly operation.

André Zimmermann, Vice President Business Aviation at Pilatus, commented: “The brand-new PC-12 PRO will be on public display for the first time ever in the Americas – a highlight for every visitor to the show. The Pilatus booth will also feature the latest version of the PC-24 Super Versatile

Jet.”

The PC-24 is the world’s first business jet made to operate on short, unpaved runways. The Pilatus Advanced Cockpit Environment comes with a wealth of functions to deliver an exceptionally user-friendly smart cockpit approved for single pilot operation. The PC-24’s cabin volume surpasses even that of business jets costing up to twice as much. The spacious layout and option to transform a comfortable divan into a full-size bed ensure that every flight is an opportunity to experience comfort at its very best. The latest version also has improved range and payload capacity.
